

Business Sustainability

AREAS: Urban farming & sustainability consulting & training | Survival skills

SERVING: Tokyo, Japan, worldwide

About Business Grow

Business Grow is a Tokyo-based company specializing in providing [urban farming](#) and [sustainability](#) services and advice. We teach and advise individuals, families, clubs, schools and businesses:

1. How to grow no-spray food in urban environments
2. [Sustainability](#), recycling and [disaster preparedness & recovery skills](#).

How can we help you?

Ensuring business sustainability is more than just keeping data backups and having an off-site work location in case of emergency. It's also about protecting key assets – staff – and ensuring they know how to prepare for and survive a disaster.

We show people how to prepare for disasters and grow healthy urban food on site to help make families, schools and businesses more sustainable and self-sufficient. **Here's how:**

- [Home/office survival skills training](#)
- Urban farming training – [Beginners](#) [Advanced](#)
- [Sustainability skills training](#)
- [Urban farming/sustainability lectures](#)
- [Office food growing services](#)
- [Rooftop gardens](#)

Points of difference

- **Experience** – Director Jon Walsh has 6 years' experience teaching urban farming and sustainability skills to over 500 people in Tokyo
- **Niche** – Jon is possibly the only native English-speaking professional urban farming consultant and instructor in Tokyo, possibly all of Japan
- **Hands-on experience** growing large quantities of healthy food in Japan growing conditions.
